Task 1: Flying Start

Comments:

At enrolment you were given some 'flying start' questions to complete.

- Log into Dr Frost Maths and enter your answers.
- Self-mark your own copy of the work in a different colour pen.
- Correct your answer where possible. Highlight any you cannot do.

Task 2: Scanning and Email

Comments:

Where possible, try to install the following apps on your phone:

- Microsoft Outlook
- Adobe Scan

Use the video tutorials on the course page to try and send me a test scan of your 'flying start' work.

Don't worry if you have difficulties, but please do try to get in touch so that we can attempt to resolve them where possible.

Task 3: BitPaper

Comments:

- Create/Log into your BitPaper account (ensure you used your college email account).
- Copy the web address (URL).
- Send it to me in an email.
 - Include your preferred short-link (e.g. parkermaths.com/bob1)

Task 4: Equipment Check

Comments:

- Check the list on the start of the year PowerPoint and ensure you have the required equipment.
- Pass on the calculator letter to whoever will be responsible for purchasing it.
- Try not to leave sorting your calculator too long – sometimes students forget and then get anxious when others are learning to use their calculator in lesson.

Maths Joke

Comments:

Q: What do you call a number that can't keep still?

A: A Roamin' Numeral
